Dear Mr. Smith:

As instructed by Mr. John T. Blake I am filling this as a Declaration of Exemption as you can see by the enclosed letter and map we are well under the two acre requirement.

Sincerely,

  
Gerald W. Berry

3100 State Office Building  
Salt Lake City, Utah 84114

Dear Mr. Blake:

If Orders for material and weather permit we will work in ML 26755 in two different areas. Point #1 will be a pit about 100 feet length by 250 feet wide by 20 to 30 feet deep. Point #2 will be finishing up work in a pit of about the same size which is about finished. See enclosed map. Reclamation is done at the same time as we dig by spreading the earth in to as gentle a slope as possible. Within two or three years after completing a pit we then drag it with the dozer blade and seed it with clover.

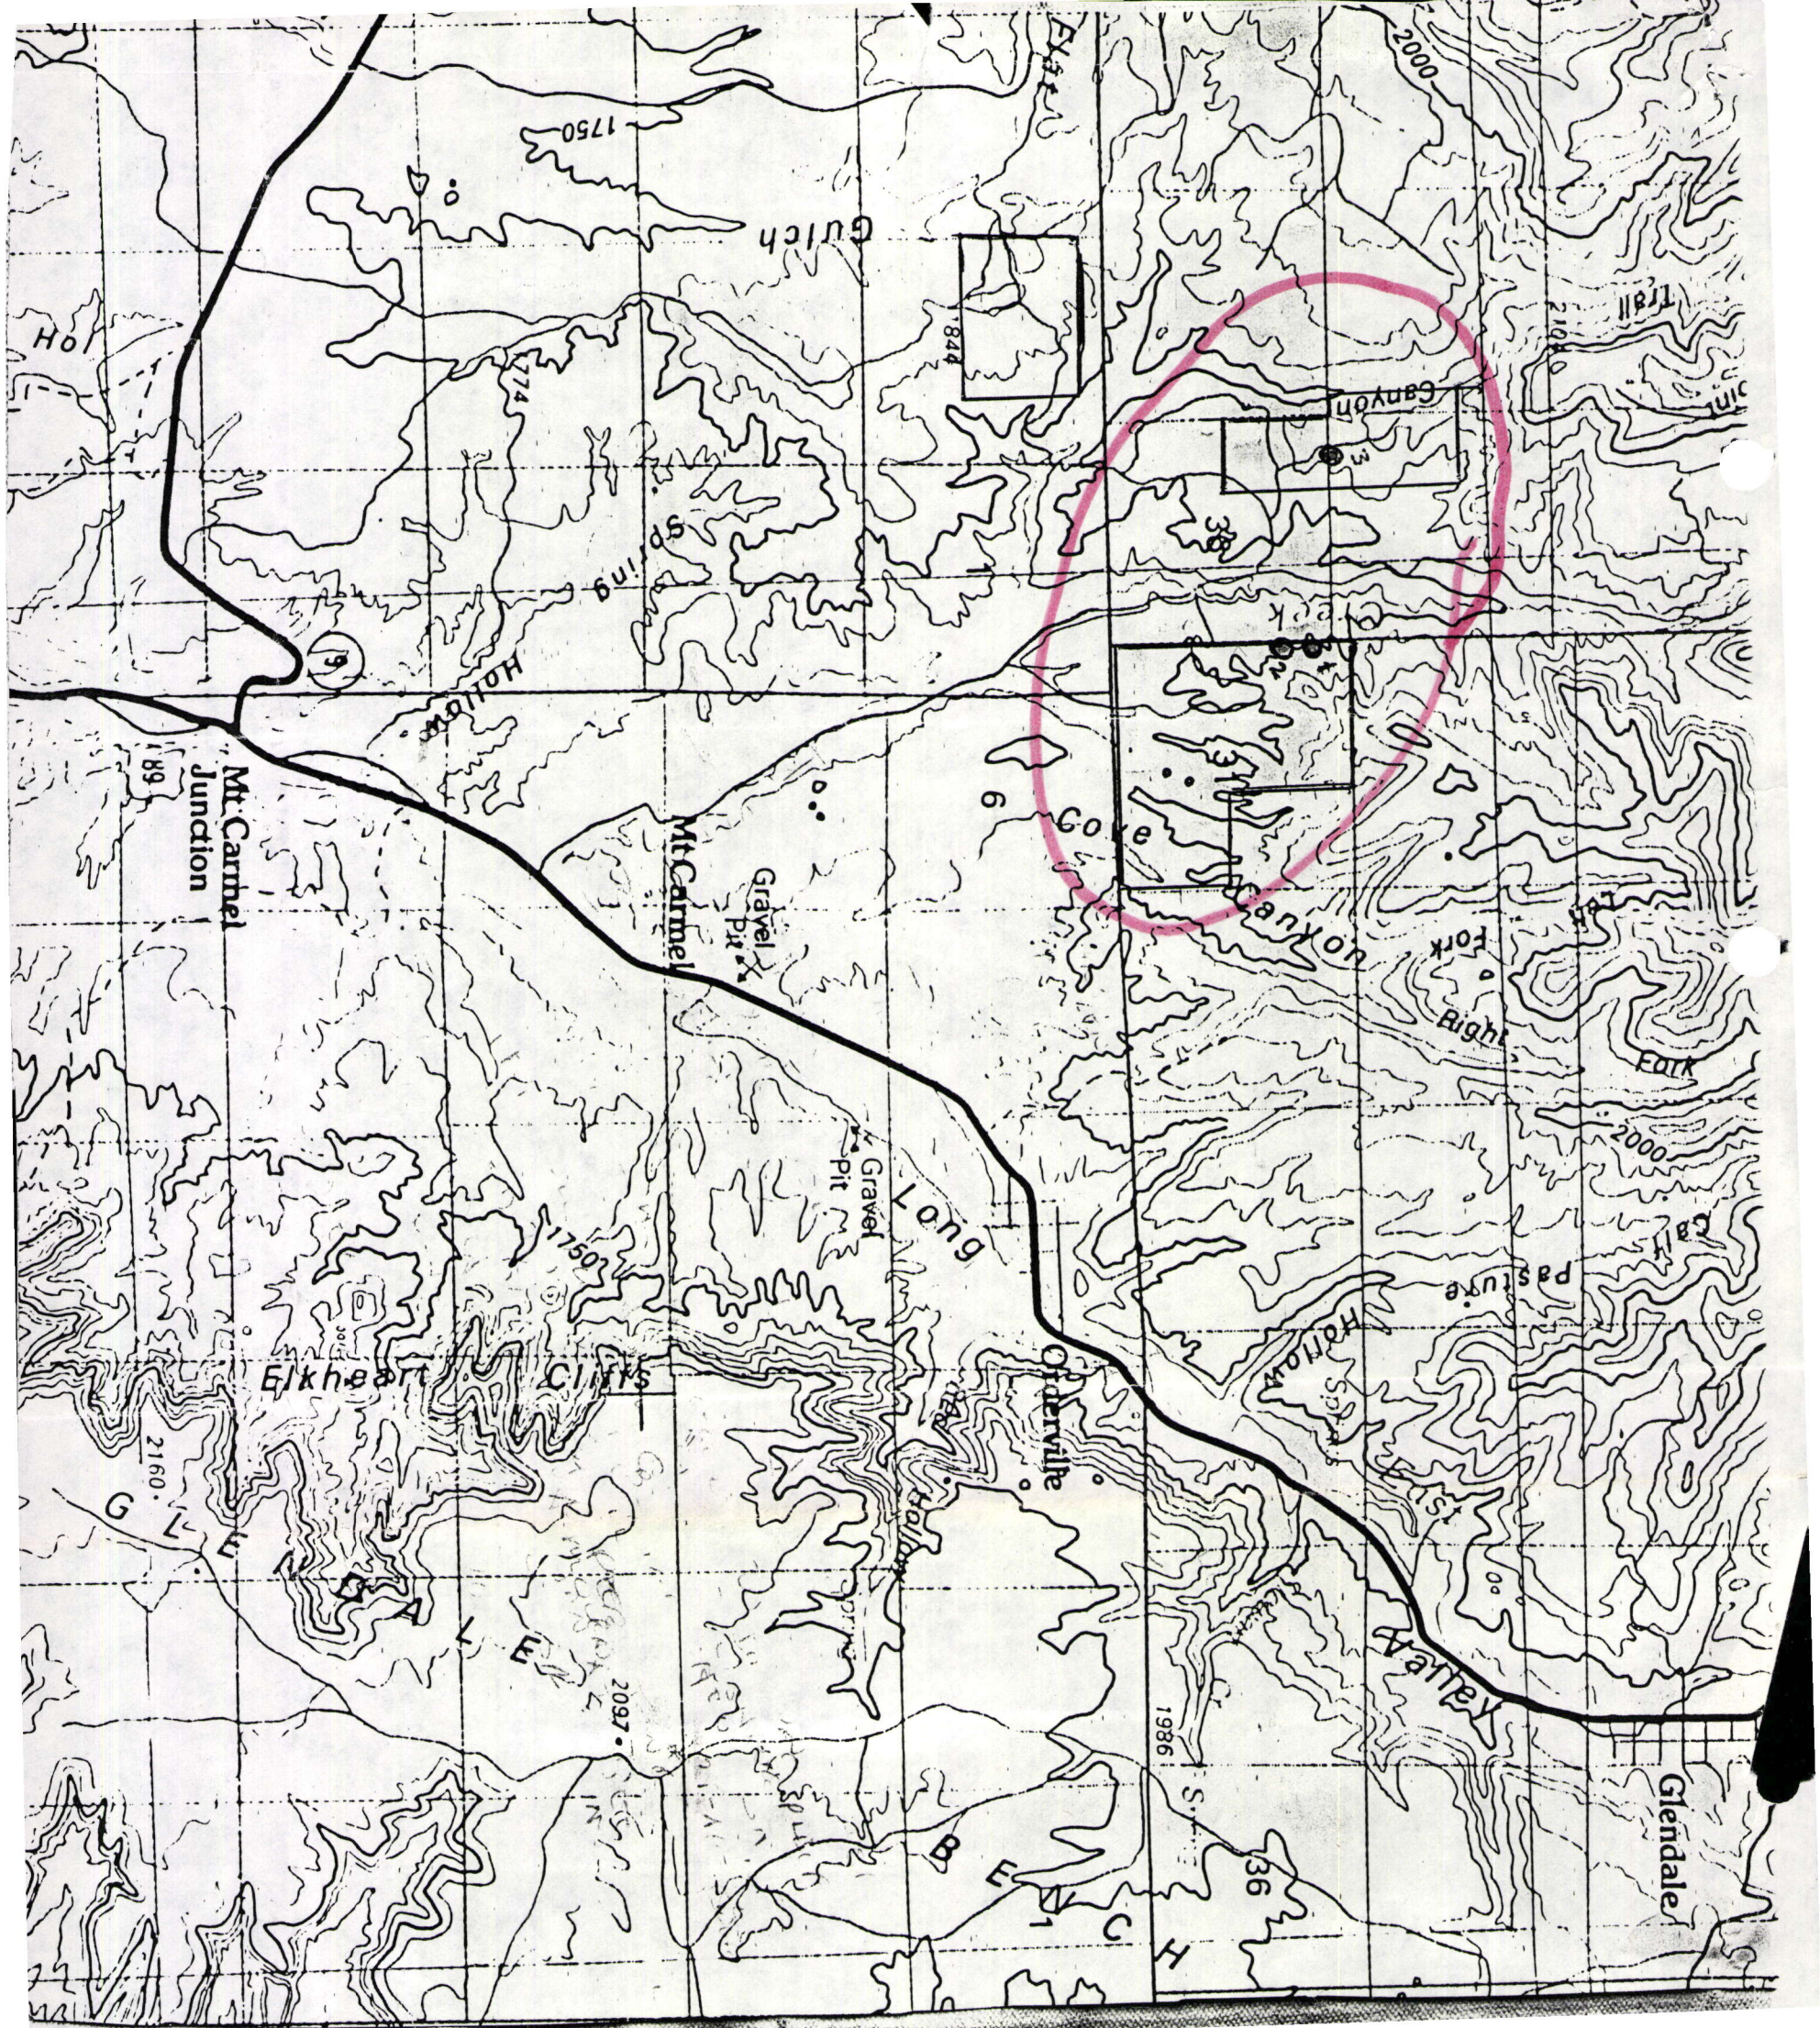

If time and money permit we may excavate a small amount at Point #3 but this will be a very small amount taking down an area 50 by 100 feet one or two meters deep.

Sincerely,

---

Gerald W. Berry
